Moses Krmaall who has been nomi-lated for Mayor by the Republicans of

Boston, is a great wag. The Yew York fam tells the following story of him: a When the Ohlcago and Rock Island Railroad was opened, in 1852 we think it was, a great party was taken out from the seaboard to see the West. One of the stars of the assemblage was President Fillmore, another was Moaes Kimball. We all went up the Mississippl on board a fleet of steambosts. At every lown the boats would be brought up to the ahore; and the people gathering around would listen to a speech from Mr. Fillmore. Now,popular oratory is not the forte of that distinguished statesman. It was soon evident that he made the same speech, in substance at least, at every stopping place. Fresently, the spirit of mischief entered into Kimball, and while the President was delivering his solemn obsergations on one side of the boat, the observations on one side of the boat, the representative of Boston would proceed to deliver the same speech to another crowd on the other side. The fun was immense.

A REMARKABLE account is given in a late English paper of the escape of a convict from prison. The cell in which he was confined had an Iron door, with a look entirely on the outside. The only implements the prisoner had were wooden spoon, some bits of wire, and needle and thread. Out of the spoon h made a key; by means of the needle he passed a thread over and under the door; bits of wire were pushed through the inspection hole and fastened to this long thread extending outside from top to bottom. The key was also pushed through, and, being fastened to the thread, was brought opposite the key-hole by dexterous manipulations of the siender line, worked gently in, then turned by means of the wire, and the door was opened. This is certainly one of the greatest exhibitions of skill and patience on record. passed a thread over and under the
